## Amendments to the Claims

1. (Canceled)

Application No.: 10/721,340

Art Unit 3676

2. (Currently Amended) An apparatus dryer latch for opening/closing a door of a dryer, comprising:

a hook adapted to be provided at one side of the door of the dryer wherein a hanging portion is formed at both sides of one end of the hook;

a latch body adapted to be provided to one side of a front panel having the door installed thereon wherein the hanging portion is inserted in an insertion hole formed in the latch body;

a pair of holders linearly slidable in the latch body provided to confront each other in the latch body to directly hold the hanging portion; and

a pair of springs provided in the rear of the holders, respectively, wherein the latch body comprises:

a first reception part having side wall portions and receiving the hanging portion; and

a pair of second reception parts provided adjacent to both opposing sides side walls of the first reception part to hold and guide the holders, respectively, and

wherein a protrusion is formed on one side of each of the holders to be

held against sliding in the latch body by an upper end one of the side wall

portions of the first reception part.

3. The apparatus dryer latch as claimed in (Currently Amended)

claim 2, wherein a pair of passing holes communicating with the second

reception parts are formed at both of the sides side wall portions of the first

reception part to let the holders pass through, respectively.

4. (Currently Amended) The apparatus dryer latch as claimed in

claim 2, wherein a recess is formed at one end of each of the second reception

parts to support the corresponding spring.

5. (Canceled)

6. The apparatus dryer latch as claimed in (Currently Amended)

claim 2, wherein the hanging portion formed at both sides of one end of the hook

has a triangular cross-section.

7. (Currently Amended) The apparatus dryer latch as claimed in claim

6, wherein confronting planes of the holders are inclined to correspond to the

triangular cross-section of the hanging portion.

8. (Currently Amended) The apparatus dryer latch as claimed in

claim 2, wherein a surface of the hanging portion to be brought in contact with

the holders is rounded.

9. (Currently Amended) The apparatus dryer latch as claimed in

claim 8, wherein two confronting ends of the holders are rounded.

10. (Currently Amended) The apparatus dryer latch as claimed in

claim 2 t, wherein a hollow portion is provided at a rear side of each of the

holders to have one end of the corresponding spring inserted therein.

11. (Currently Amended) A<del>n apparatus</del> <u>door latch</u> for

opening/closing a door of a dryer, comprising:

a hook adapted to be provided at one side of the door of the dryer wherein

a hanging portion is formed extending from both sides of one end of the hook;

Application No.: 10/721,340 Attorney Docket No. 0465-1089P

a latch body adapted to be provided to one side of a front panel having the

door installed thereon wherein the hanging portion is inserted in an insertion

hole formed in the latch body;

a pair of holders adapted to be provided to confront each other in the latch

body to hold the hanging portion;

a pair of springs provided in the rear of the holders, respectively; and

a latch cap attachable to the latch body to covering first and second

reception parts of the latch body to prevent separation of the holders and the

springs from the latch body.

12. (Currently Amended) The apparatus dryer latch as claimed in

claim 11, wherein fixing protrusions protrude from a bottom of the latch cap to

hold one ends of the springs, respectively.

13. (Currently Amended) The apparatus dryer latch as claimed in

claim 11, wherein guide protrusions protrude from a bottom of the latch cap to

guide to move movement of the holders, respectively.

14. (Currently Amended) The apparatus as claimed in claim 11,

A dryer door latch for opening/closing a door of a dryer, comprising:

a hook provided at one side of the door of the dryer wherein a portion is formed both sides of one end of the hook;

a latch body provided to one side of a front panel having the door installed thereon wherein the portion is inserted in an insertion hole formed in the latch body;

a pair of holders provided to confront each other in the latch body to hold the hanging portion;

a pair of springs provided in the rear of the holders, respectively;
a latch cap covering first and second reception parts to prevent
separation of the holders and the springs; and

wherein coupling holes are formed at corners of the latch cap and wherein bolts are in the coupling holes, respectively, to fix the latch cap to the latch body.

15. (Currently Amended) The apparatus dryer\_latch as claimed in claim 2, wherein the hook is built in one body of a fixing plate screw-coupled to one side of the door.

Application No.: 10/721,340 Art Unit 3676

The apparatus dryer latch as claimed in 16. (Currently Amended)

claim 2 1, wherein coupling holes are formed at both sides of the latch body

and wherein bolts are in the coupling holes, respectively, to fix the latch body

to the front panel.

17. (New) The combination of a laundry dryer and the dryer latch of

claim 2.

18. (New) The combination of a laundry dryer and the dryer latch of

claim 12.

(New) The combination of a laundry dryer and the dryer latch of 19.

claim 14.
